DuitOnTrack

Duit on track. Do it on track.

The AI Money Coach for Malaysian University Students

By Night Shift Coders

THE PROBLEM

**Students don't overspend on big things.
They overspend on small ones.**

Three problems every Malaysian uni student knows.

Money runs out before month-end

Allowance gone by the 22nd.
Eight more days to survive on
instant noodles.

Small spends silently compound

RM 6 boba, RM 25 Grab, RM
30 Shopee — none feel big.
All add up to overspend

Existing tools come too late

Budget apps tell you what
you spent. Bank apps show
balance. Nobody answers
before you spend

TARGET USER

Aina, 20
2nd Year, UM

Meet Aina

Meet our user. Meet 1.2 Million more.

- RM 500 / month from parents
- RM 40–80 per tutoring session, 2–4x monthly
- Goal: RM 600 Langkawi trip by semester end
- Reality: overspends RM80–120/month

THE SOLUTION

Not a Tracker. A coach.

Duit on track. Do it on track. Stay on track.

01

"Boleh ke?" Check

AI verdict before you
spend — Yes, Wait, or
No.

02

Mood Mode

Save ↔ Spend
Same data,
different coaching.

03

Goal Reports

Monthly AI-
generated patterns
and next-month
experiments.

04

Recent Decision Strips

Every coaching
decision is tracked.
See your history all
on one dashboard

LIVE DEMO

Let's get Aina on track.

Watch how every decision either puts her on track — or pulls
her off.

LIVE DEMO

System Architecture

Impact

Smarter spending decisions made before it's too late. DuitOnTrack is the first moment of pause before the purchase.

Savings goals actually get reached as DuitOnTrack ties every single spending decision back to a named goal.

Students build financial awareness by coaching students to make lots of small decisions.

Future Improvements

Auto-Monthly Report
AI generates monthly reports without manual triggers.

E-Wallet integration
Connect Touch `n Go to pull real spending data.

Native mobile applications
Push notifications that remind user to "Boleh ke?" before checking out.

Stop guessing. Start coaching.

THANK YOU
